

Industrial Metal FABRICATION

Overview

Your Premier Destination for Comprehensive Sheet Metal Fabrication Solutions! Becker Fabrications specializes in automated laser cutting and precision sheet metal fabrication as well as high volume production. Offering a complete range of integrated services, we deliver superior solutions tailored to meet your project's exact specifications, budget and timelines.

Comprehensive Capabilities:

- Advanced Laser Cutting Technology

Our state-of-the-art Fiber Optic laser cutting systems precisely handle a variety of metals, including cold-rolled steel, stainless steel, and aluminum. With automated loading and unloading, optimized part nesting, and offline programming, our laser system deliver unmatched precision, quality and cost efficiency.

- Full-Service Sheet Metal Fabrication

From initial design through final assembly, Becker provides a seamless manufacturing experience. Our services include a large variety of finishes such as zinc plating, galvanizing, assembly, and custom finishing—ensuring consistently excellent results and reduced lead times.

- Precision Manufacturing Excellence

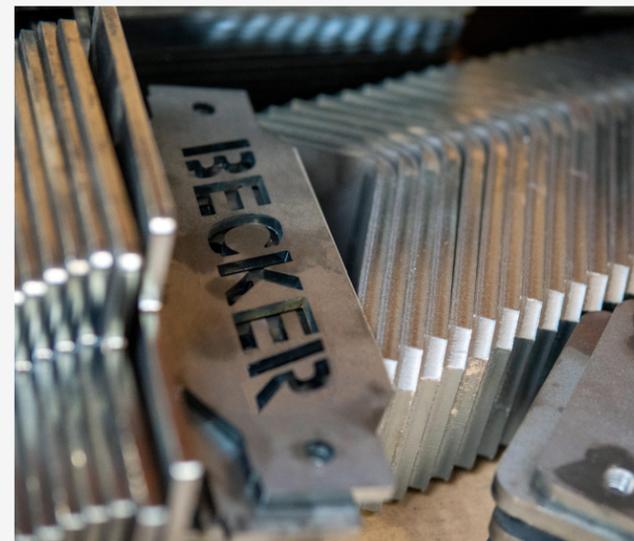

Our custom parts are meticulously manufactured to tight tolerances, guaranteeing quality that meets or exceeds industry standards. Utilizing advanced machinery, computerized production control, and engineering software, we efficiently manage projects of any scale.

- Welding & Assembly Expertise

With highly skilled Certified Welders and advanced robotic welding systems, we ensure flawless, high-quality welds for all projects. Our assembly capabilities further enhance the efficiency and reliability of your finished products.

- Efficiency, Flexibility & Cost Savings

Our automated processes operate around-the-clock, providing reduced setup downtime and unparalleled production efficiency. The flexibility of our systems allows rapid, cost-effective adjustments and significantly reduces overall production costs.

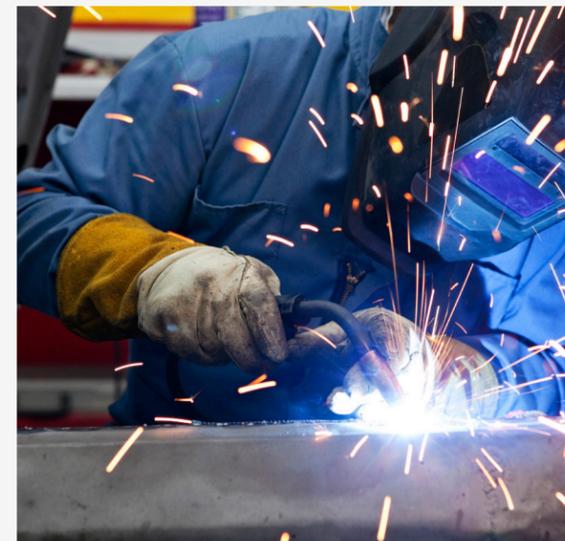

- Industries Served

Becker Fabrications proudly serves a diverse range of industries, including:

- Automotive Industry
- Aerospace & Avionics
- Industrial Automation
- Commercial Products
- Defense & Military
- Custom Projects
- Medical

Our expertise ensures tailored solutions that meet the specialized needs of each sector, delivering precision, reliability, and excellence in every project.
